Cable Address, "COMEPACKT"

Catalog "G"

Our Guarantee—The following is a copy of our *Guarantee*, which will be found in each box of furniture shipped by us:

"We guarantee the goods in this shipment to be of perfect design, workmanship and materials and that they will be found exactly as represented by us in all our advertisements, circulars and printed matter. We further agree that we will make good any defects in workmanship or materials within one year from date of purchase, at our own expense, and we will cheerfully refund full purchase price and *Freight Charges*, if you are not satisfied with your transaction, and that you have value received for your money."

Our Prices—Our prices are *Net* and f. o. b. (packed, free on board cars) Ann Arbor. Prices do not include freight charges and we make no discount for quantity. A Net Extra Charge of five per cent will be made on orders boxed for foreign shipment except to Canada and Mexico. Any order will be shipped completely assembled and ready for use (except dining tables) for five per cent. extra to cover additional cost of packing. All Come-Packt Furniture will be shipped in sections, completely stained and finished unless otherwise ordered.

Our Terms—Our terms are cash in advance, or 25 per cent when the order is placed and the balance to be collected by draft attached to Bill of Lading. On orders amounting to \$10.00 or less, cash in full should accompany the order, or collection charges must be assumed by the Purchaser. We sell in no other way. This means that we cannot carry accounts on our books, regardless of the rating or financial responsibility of the purchaser. We have no installment or partial payment plan.

Our References—We refer you to the Ann Arbor Banks, or to the Commercial Agencies as to our responsibility and financial standing.

Our Sectional Furniture

Our Selling Plan—The diagram on the opposite page shows clearly our method of selling goods and shipping direct from the factory to user. It explains graphically what you are paying for when you buy of the local dealer and while these profits and expenses add full fifty per cent to the purchase price, they do not increase the actual VALUE of the goods to the user. We state to you frankly, that we make a profit on every article we sell (we are in business to make money) but there is only one profit and not one penny has been added that increases only the price and not the value of the goods. We want your business, if we can save you money, and suggest that we make up a list of the furniture that you are interested in and let us quote you a price, with freight added to your city, we will also send samples of our different cushion coverings and stains for your guidance in placing a definite order. The delivered price will give you a definite basis for making comparisons with the cost of the completed furniture in your local stores. We know that you will be delighted with the quality of our workmanship and materials.

What "Come-Packt" Sectional Furniture Is—Sectional Furniture is not a new invention or discovery. We have taken an old idea, carried it along—modernized it and applied it to practically all the furnishings that come under the head of "Home Furniture." We have taken the modern way, the economical way for both producer and consumer of selling DIRECT from factory to User.

the tenons the full width of the materials used and at least $\frac{3}{4}$ of an inch long—this gives ample surface for holding the glue; we know that these joints cannot shrink and work loose after hard service—they cost considerably more to make than the "dowel" joint (see illustration No. 2), which we DO NOT USE, but they are well worth the extra cost in the satisfaction of knowing that we have not "skipped" in our construction details.

Note the small surface afforded by the "dowel" joint, which has only the strength of the pins shown, yet the dowel joint is used in nine-tenths of the furniture made by other manufacturers.

Until furniture has been used for a year or more, you may not appreciate just what it means to the life of a piece to have not only the best materials used, but to have all joints perfectly made and of sufficient strength to stand constant and hard service, and possibly some abuse, without necessitating a trip to the furniture hospital.

We never necessary, we send liquid glue to spread on the tenons before inserting them in the mortises—we use the best quality of glue and know that the joint will be perfect and give lasting satisfaction to the user. In all other parts of the construction, we use just as great care as in making the mortise and tenon joints.

G328

G24

G319

To go into details: We manufacture a high grade of quarter-sawn white oak furniture of the Mission and Arts and Crafts and Bungalow Styles. The machining, joiner work, fitting, sanding, etc., up to the assembling stage is carried on the same as in other factories where high grade furniture is made, but here our processes diverge—the other factories assemble the pieces into completed articles and send them to the finishing rooms. We assemble the pieces into sections, or completed units, and send them to the packing or finishing rooms to be inspected and boxed for shipment.

No. 1

No. 2

In the greater number of our designs, the Sections are put together with screws, or patent fasteners. There is no sanding, fitting or other tool work for you to do before putting the sections together. When the sections are together, the furniture is substantial, solid, durable, and except in a very few cases cannot be taken apart for re-shipment.

Illustration No. G 328 shows the sections of one of our Library tables, one of the handsomest of our Tables, and also one of the easiest to assemble. The sectional view of dining table G 319 shows the ease with which it can be assembled, just twenty-four screws to put into the holes which are already bored and the table ready for the stain. G24 shows the sections of one of our rockers. These few pieces, selected at random, show the ease and simplicity of putting the assembled sections together. No skill or mechanical knowledge is necessary—a few minutes work will assemble our largest pieces. The life of a piece of furniture depends, first, on the materials used, and second, on the way the different pieces or parts are put together.

Wherever a joint is to be made that from its nature cannot be satisfactorily held together with patent fasteners or screws, we use the "Mortise and Tenon" joint (see illustration No. 1), and make

TOPS FOR SOME OF OUR TABLES

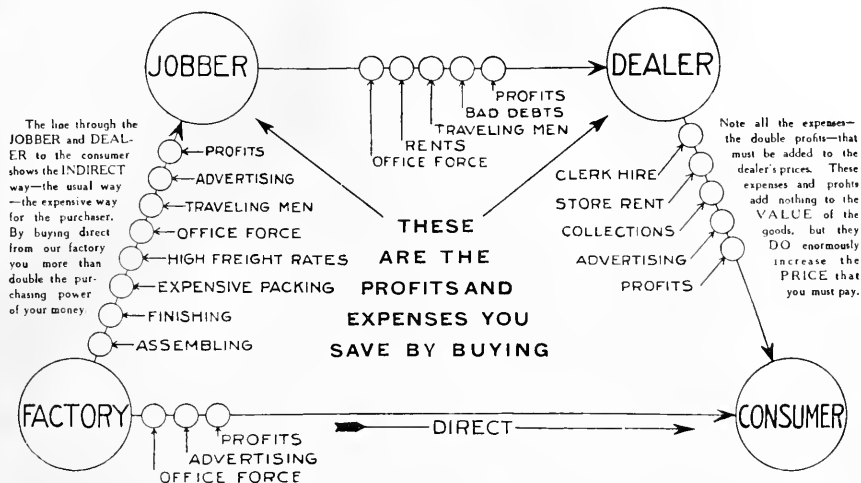

Materials—The quality of our workmanship and materials is undisputed—our immense business is built on the only foundation that will stand the test of time and service and that is QUALITY. There can never be any permanent economy in buying inferior quality, no matter how low the price and we have never made an effort to attract orders purely on the question of price. We emphasize first, "QUALITY" and then the saving that can be made by buying direct from our factory with all the useless expenses and profits of the ordinary way of doing business eliminated. Unscrupulous salesmen and others will attempt to deceive you by glossing over the real quality of the materials offered, they will say that their furniture is made of "solid oak" (which is a clever subterfuge and really means nothing at all, so far as furniture quality is concerned). Quarter-sawn white oak issued only in the best of the high grade furniture. Plain-sawn oak, or a mixture of plain red and white oak is an advertisement of its own inferiority. The difference of fifty per cent in the cost of the raw materials does not represent the real difference in the appearance of the completed furniture. You have a right to know the quality of the goods you buy and we specifically say in all of our advertisements and printed matter that we use quarter-sawn white oak and we do not attempt any deception, nor play on your possible lack of information as to quality by saying that our furniture is made of "solid oak." The small illustrations in the catalog cannot bring out all the richness of the actual wood, the mellow softness and lustre that is imparted to the grain and flake by stains and wax finish. In shipping our goods out unstained, we cannot substitute red oak or other inferior materials, or patch up defects as can be done when the furniture is finished, colored and varnished and sold to you under an artificial light in a store. No other wood is "just as good" as quarter-sawn white oak for our styles of furniture.

On account of our method of shipping furniture in sections we make use of a laminated five ply top for some of our tables, each top being made up of five thicknesses wood with the grain of each layer running in a different direction. These tops cost considerably more than solid tops but we know they will never warp or get out of shape, the mirrors used with our furniture are the best quality heavy genuine French bevel plate and are free from imperfections of any kind.

Workmanship—In order to back up our guarantee to the letter, it is needless to state that the best machines procurable and intelligent men to run them are essential parts of our equipment and organization.

All machining, sanding, joiner work, fitting, etc., is done by skilled workmen and they have at their service the best machinery obtainable.

Our Selling Plan

OUR SELLING PLAN—Sectional Furniture, direct from Factory to User means **ECONOMY** in manufacturing, selling, shipping and finishing. Our whole effort is directed towards producing and marketing the highest grade of Furniture for the least money. The continuous patronage of our customers is the life blood of our business. We aim to conduct our business so that every purchaser becomes a permanent customer and an effective and willing advertiser of our goods. Study the diagram and our selling plan above.

Stains—We have found it impossible to reproduce in a color photograph, all the soft, lustrous tones which are imparted to the quartered white oak by our oil stains, and therefore suggest that you ask us for samples of the actual colors (we will gladly mail them to you together with actual samples of our cushion coverings). The samples will show you actual colors of our stains and the color and grade of the cushion materials. We furnish the following spirit stains: dark weathered (a brownish black), Early English (a greenish black), Flemish (black or brown, as ordered), Green Weathered (a pronounced green), Nut Brown (a pronounced tobacco brown), Fumed (a medium brown), Golden Oak (light golden brown), English Oak (a reddish brown). When ordered "in the White" a sufficient quantity of stain will be sent with each order to complete the piece, together with sufficient furniture wax to form a hard, permanent and satisfactory outer finish, in fact the finish will be identical with the best of the completed furniture. However, all furniture will be shipped completely finished unless you plainly specify "unstained" or "in the white."

Cushions and Cushion Materials—The price of each piece includes, where necessary, complete "pillow" cushions as shown in the different illustrations, covered with the best grade of "Imperial Leather." We furnish the pillow cushions in response to an almost universal demand for that particular style, although we will, on request, furnish the spring box cushions at the same price. The seat cushions and back pillows will be stuffed with thoroughly cleaned and sanitary cotton and of sufficient thickness to give the maximum of elasticity and comfort. The seat cushions will not be made reversible unless specially ordered and at an extra cost. Prices quoted on application.

"Imperial" leather is a soft and durable substitute that is hardly to be distinguished from the genuine leathers. We especially recommend it as being preferable to any-

thing but the best grade of the genuine leathers. The Imperial leather will be furnished in red, brown, green or black and in all colors, except black, a choice is offered between the "Natural grain" (a fine figured effect with small irregular markings) or the "Spanish grain" (a large figured effect with large irregular markings). The black can be furnished only in a pebbled grain. The Imperial, or Imitation leather samples may be distinguished from the cow hide from the fact that it has a cloth or saten backing. We will be glad to send samples on request.

For the benefit of those who are not familiar with the different grades of leathers, we will say that every whole hide (cow hide) is split into three separate and distinct hides. The best hide of course, is the outer, or grain hide, which we use exclusively. The "middle" and "flesh" splits are worked up into clever imitations of the outer hide, but they do not stand the test of time. These split leathers can be bought for the same price as the "Imperial" leathers, but we would not guarantee them to last six months in actual service.

The Cow Hides can be furnished in red, brown, green or black and in either the "smooth" or "Spanish" Grain. (See prices of Genuine Leather Covers under the description of each piece.)

The Genuine Morocco Roan Skins are an imported goat hide. They are soft, durable and guaranteed to wear for years. The Roan skins can be furnished in red, brown or green, but only in the pebbled grain.

The so-called Roan skins that are usually sold to those who are not familiar with leathers, are nothing more or less than sheep skins. They will not wear well and we do not handle them. We use nothing but the best grade of "Imperial" leather, which we do guarantee to wear, and the best grade of Genuine Roan skins and Cow hides.

Our Selling Plan---Continued

When Ordering—Give the catalog number of each piece and state the color of stain, cushions, etc., desired; also specify whether furniture is to be "stained" or "in the white," also how much money is enclosed and in what form—post office money order, which you secure at the postoffice; express money order, which you secure at the express office; bank draft, which you secure at your bank, or send us personal check. We recommend the Post-office and Express orders as being perhaps, the safest and most convenient way to send money. Always register a letter that contains currency, or stamps. Our order sheet is a convenience—not a necessity. Write all in a letter if you prefer.

New Designs—We originate our own designs and all furniture listed by us is made in our own factory. In designing a piece we keep in mind several points—it must have refinement of outline, utility, durability and correct proportions. It must be so designed that it can be put together easily and without the aid of clamps, wedges and the usual cabinet-maker's tools. The assembling of the sections must be made so simple that it will be IMPOSSIBLE for a person to put the sections together in any way but the right way. Nothing is left to guess work. We will send you cuts of new designs as we get them out.

Special Works—We do not do special work, or make alterations in our regular designs. We receive so many requests for special cushions, special designs in furniture, or requests for alterations of designs or dimensions that we find it necessary to particularly emphasize that we cannot make any exceptions to this rule.

How Goods Are Shipped—Shipping by freight is usually the cheapest way to forward goods weighing over twenty pounds. The railroads have what is called a "minimum charge," which means the least amount of money they will haul a shipment for, no matter how little it weighs. The minimum charge is usually figured on the basis of one hundred pounds at either the first or second class rate. It is on account of the minimum charge that we recommend that your order be for one or more pieces weighing over 100 pounds. All shipments weighing over 100 pounds are charged for at actual weight.

Shipments by freight are safe and reliable and the freight never amounts to much compared with the saving you make on every purchase. Remember that the Dealer has to pay about four or five times as much freight on the completed furniture and the freight charges are always added to his selling prices.

The freight agent at your station will notify you when goods arrive and the freight charges are paid when you take the goods from the station. There is no difference in rates whether freight is paid here or at destination.

Prepaying Freight Charges—We do not prepay freight charges on our furniture for the reason that where a delivered price is made, the freight charges are always added to the selling price, and our prices would have to be raised to cover the freight charges all over the United States.

If there is no freight agent at your station, enclose enough money to prepay freight charges, or we will send the goods to the nearest station where there is an agent. (Send too much money rather than too little. We will immediately refund the difference).

Prompt Shipments—We aim to keep a large stock on hand at all times and make immediate shipment of all orders coming to us.

Delayed Shipments—If, for any reason we cannot make shipment of your order immediately, we will notify you to this effect, and either ship when the goods are ready to go forward or refund your money in full.

Tracing Shipments—Wait a reasonable length of time before requesting our Traffic Department to trace a shipment; give the goods time to reach destination. However, if a shipment is unreasonably delayed, we will spare no efforts to trace the shipment for you and will consider it a favor to have you call on us for all the assistance necessary.

Damaged Goods—It is very seldom that goods packed by us reach destination in damaged condition; but, if they are damaged, in any way, see that the Freight Agent makes a notation on the freight bill that you pay, stating what the damage consists of, you then have the basis for a claim for damages. Unless these facts are plainly written across the face of the freight receipt, you cannot enter a claim for damage or shortage. We will not be responsible for glass, or other parts, broken or damaged while in transit, unless the paid freight bill is sent to us with the Agent's notation showing the nature of the damage, or if this cannot be obtained, an affidavit sworn to before a Notary, as to the nature of the damage, will be accepted in its stead, both by us and by the Railroad Companies when filing a claim.

City Delivery—May be simplified by mentioning in your order the name of some local cartage, drayage or transfer company. We will then ship to you in care of that company and they will deliver the furniture immediately upon arrival and collect from you for freight charge (if not prepaid), and their small charge for cartage from the depot to your home.

Goods to be Returned—We will give full shipping instructions on all goods that are to be returned to us for any reason whatsoever. DO NOT RETURN GOODS WITHOUT FIRST COMMUNICATING WITH US, as we can frequently adjust matters satisfactorily to you without the delay of returning them. Always see that your name and address are plainly written or stamped on packages which are to be returned to us.

Claims—Our Claim Department will, if desired, enter all claims for lost or damaged goods, when the freight receipt (expense bill) is returned to us with proper notation on same, showing the goods to have been damaged in transit. All money paid on the claim will be immediately returned to you.

Flanders, Bungalow and Mission Designs—The enormous popularity enjoyed by the purely Mission furniture, with its severely plain lines, has given rise to a steadily increasing demand for furniture of the same sturdy construction but with some ornamentation to relieve its severity without detracting from its quiet dignity, symmetry and perfect proportions. The modern Flemish Renaissance or "Flanders" designs (now quite commonly called "Bungalow" Furniture) with its bulbous turnings, cleverly balanced with plain surfaces satisfies these requirements, but there is nothing over-ornate to offend good taste and a combination of the Flanders and Mission may be used indiscriminately in the same room.

All prices include plain glass doors. Shipping weight, 3 book sections and one desk section, top and base 140 pounds. Shipped knocked down.

WELL WORTH THE MONEY

This is to acknowledge receipt of writing table. It arrived in good condition and certainly made a good looking piece of furniture after it was put together. I could not have gotten anything like it in Oakland for the same money.

Yours truly, FLORA HENSEN.

15 Helen St., Oakland, Cal.

Nov. 3rd, '10.

G 213 Gate End Davenport Bed

G 213 Gate End Davenport Bed

The gate-end Davenport Bed must be seen to bring out all of the real beauty of the design and the merit of this exceptionally fine piece of furniture. Its appearance as a Davenport gives no hint of its possibilities as a bed, and yet it is full fifty inches wide when opened out and is in reality as perfect a bed in appearance and as comfortable as any bed could be. A dust-proof box provides a place for the bedding by day, and the upholstered spring cushions insure the restful comfort that a bed should possess. There are no objectionable features and nothing to get out of order. It is a perfect bed and a perfect Davenport at the price of one piece. Each cushion is in reality, a combination of a half size high grade bed spring with a mattress top. Sixty-five oil tempered high carbon steel hour glass springs in each cushion insuring the maximum of elasticity and comfort. Shipping weight 370 pounds.

Come-Packt Price \$33.25. In figured denim cloth, samples sent on request. Imperial leather covers, \$35.75. Cow-hide covers, \$47.50. Each cushion 75 inches long, 25 inches wide. Height of ends 34 inches. Length over all 82½ inches. As a Davenport the front post stands 38½ inches from wall. Height of back cushion (as davenport) 39 inches.

If there is any Reason why you hesitate to Place an Order with us, we will Consider it a Favor if you will Write and tell us just What it is. Our continued and Successful experience will probably enable us to Satisfy your every Requirement

G 602 Den Couch

Come-Packt Furniture has been continuously Advertised in the best of the National Magazines and our Trade Mark on Furniture, like the imprint "Sterling" on Silver, is a guarantee of Quality.

G 312 Library Table

Come-Packt Price \$5.25. Dealer's price \$9.50. Height 30 inches, Top 30 inches. Shipping weight 70 pounds.

Our prices represent one reasonable profit added to the actual costs of production—they are not a measure of the real value of the Come-Packt furniture.

PLEASED WITH OUR PROMPTNESS

I wish to thank your company for the very satisfactory Morris Chair you sent me and for your promptness in filling the order. I shall be pleased to patronize you again.

Yours very truly,

B. F. LUTMAN,

Nov. 11, '10.

Burlington, Vt.

A Man is judged as much by the Furnishings in his home as by the Clothes he wears or the friends he cultivates—it does not cost as much to have Come-Packt Furniture in your home as the "near" furniture and its Quality and Appearance calls for no apology.

G 306 Library Table

Come-Packt Price \$7.25. Dealer's price \$18.00. Height 30 inches, Top 36x22 inches, Legs 1½ inches square. Four hook shelves 18 inches long, 8½ inches deep, 9½ inches high. Choice of Antique Copper or Wood Drawer Knobs. Shipping weight 130 pounds.

PARTS FIT PERFECTLY

Library and Serving Table received in good condition. We have assembled and finished them with little work, as everything was so constructed they fitted perfectly. I am certainly pleased. My Library Table looks as good as though I had bought it all ready from a furniture store and only cost about half as much.

Respectfully,
 MRS. D. C. FRANK,
 Hobart, Indiana

TRIAL ORDERS

We realize that we could increase our sales tremendously if every one who is at all interested in furniture could see our goods in all processes from the rough lumber to the finishing room. If a trial order is unsatisfactory we are heavy losers as we cannot handle a single first order at a profit, yet a trial order is what we really want as it almost invariably secures further orders and a hearty recommendation for Come-Packt.

Come-Packt Price \$4.50. Six \$25.50. Imperial leather cushions. Dealer's price \$9.00 each. Cow-hide or Roan skin covers, \$2.75 each extra. With arms 75 cents extra per chair. Height 38 inches, Seat 17½x18 inches. These chairs cannot be shipped in sections. The above prices include cost of assembling and packing. Shipping weight 50 pounds, six, 180 pounds. Spring seat cushions furnished with G112 chairs.

We own and operate our own Factory, and the only Steps between you and the Rough Lumber are our Machine and Packing rooms—there can never be any greater Economy than this.

Arms for Diners, Nos. G100, 101, 102, 103, 104 111 and 112 will be furnished for 75 cents net extra per chair. Add 75 cents to the price for six chairs if one of the set is to be furnished with arms as shown in illustration above.

TO THE POINT

The furniture we purchased from you arrived in the best of order, has been set together with but little difficulty and is now adorning our home.

To say that we are pleased with the goods assembled would be feebly expressing our admiration of the pieces.

Yours,

E. R. MAHONEY,

Sept. 12th, '10.

Chicago, Ill.

G 429 Buffet

Come-Packt Price \$19.25. Dealer's price \$42.00. Bevel French Mirror. Height 57 inches, Height to top shelf 40 inches, Width 48 inches, Depth 20 inches, Legs 1½ inches, Mirror 10x30 inches. Four drawers, Antique Copper Trimmings. Shipping weight 300 pounds.

G 345 Pedestal Table

Come-Packt Price \$21.50. (54-inch top). With 60 inch Top, \$26.25; with 48-inch Top, \$19.25; with 45-inch Top, \$17.75. Dealer's price \$47.00. Height 30 inches, Top will extend to 9 feet with six leaves; three 9-inch leaves only furnished, extra leaves 54-inch \$1.00. Top and pedestal lock included. Shipping weight 54-inch, 340 pounds. These prices include round or square top and 3 leaves.

Many Manufacturers, usually of the Nameless kind, will tell you that "Oak is Oak." An article may be truly sold as "Solid Oak," and yet be built of Inferior Oak. The first Requisite is the Selection of thoroughly Seasoned and Kiln-dried Lumber of High Grade. Quarter Sawn Oak, owing to the great Waste in its manufacture, costs Twice as much as the Plain Sawn Variety.

G 346 Serving Table

Come-Packt Price \$8.75. Dealer's price \$15.00. Height 34½ inches, Top 35x18 inches. Shipping weight 125 pounds.

G 111 Dining Chair

Three plain sawn white oak leaves furnished with all extension tables.

Come-Packt Price \$3.50. Six \$21.00. Imperial leather seat pads. Cow-hide or Roan skin, each 75 cents extra. With arm 75 cents per chair extra. Dealer's price \$5.50 each. Height 38 inches, Seat 17½x18 inches. Shipping weight (one) 50 pounds, (six) 160 pounds.

G 428 China Closet

Come-Packt Price \$17.75. (Including mirror but not glass). Glass inserted, \$2.50 extra. Dealer's price \$42.00. Height 59 inches, Width 36 inches, Depth 16 inches, Mirror 6x24 inches, Glass 14x26 inches and 10x26 inches. Shipping weight 220 pounds.

Buffets, Dressers, China Cabinets and other "Case Goods" are shipped out completely assembled, except that one section will be left unfastened, thus securing the benefit of the lower freight rates.

G 427 Buffet

Come-Packt Price \$26.25. With French bevel plate mirror Dealer's price \$60.00. Height 55 inches, Height to top shelf 40 inches, Width 56 inches, Depth 21 inches, Legs 2½ inches, Mirror 10x44 inches. Three drawers, Antique Copper Trimmings. Shipping weight 360 pounds.

G 344 Dining Table

Come-Packt Price \$19.25. 54 in. top, With 60-inch top, \$24.00. Dealer's price \$45.00. Height 30 inches, Legs 3¼ inches square, will extend to 9 feet with 6 leaves. Three 9-inch leaves only furnished; extra leaves 54-inch, \$1.00 each. Shipping weight 54-inch, 340 pounds.

G 102 Diner

Come-Packt Price \$3.25. (Imperial leather seat pad). (Six, \$18.00.) Cow-hide or Roan skin, 50 cents each extra. With arms 75 cents per chair, extra. Dealer's price \$5.75 each. Height 38 inches, Seat $17\frac{1}{2} \times 18$ inches. Shipping weight 50 pounds, six, 160 pounds.

G 323 Serving Table

Come-Packt Price \$8.25. Dealer's price \$14.50. Height $34\frac{1}{2}$ inches, Top 35×18 inches. Antique Copper Knobs, Shipping weight 125 pounds.

G 411 Buffet

Come-Packt Price \$23.75. Dealer's price \$55.00. Extreme height 54 inches, Height to top shelf 40 inches, Width 36 inches, Depth 21 inches, Legs $2\frac{1}{2}$ inches. Three drawers, Antique Copper Trimmings. Shipping weight 360 pounds

G 414 China Closet

Come-Packt Price \$15.75. (Without glass). Glass inserted, \$2.50 extra. Dealer's price \$39.00. Height 59 inches, Width 36 inches, Depth 16 inches, Glass 14×26 inches and 10×26 inches. Shipping weight 220 pounds.

A point worth Remembering when buying Furniture is to assure yourself not only of the Materials used in construction but to know that it is made by a responsible Concern, one whose Business Policy will not permit of "sharp practice" either in Manufacturing or Selling.

G 319 Dining Table

Come-Packt Price \$19.75. 54-inch top. With 48 inch top, \$18.50. With 60 inch top, \$24.50. Dealer's price \$45.00. Additional 54 inch leaves \$1.00 each. Shipping weight (54 inch), 340 pounds.

QUARTERED WHITE OAK

G 317 Dining Table

Come-Packt Price \$16.50. 45-inch. 48 inch top, \$18.00. 54 inch top, \$19.50. Dealer's price \$36.00. Additional leaves (45 inch) 85 cents each. Height 30 inches, Legs 3½ inches square. Will extend 7 feet 6 inches with 5 leaves. Three 9-inch leaves furnished. The prices include either round or square tops, and 3 leaves. Shipping weight (45 inch), 220 pounds.

G 103 Diner

Come-Packt Price \$3.00. Imperial leather seat pad. (Six), \$16.50. Cow-hide or Roan skin, 50 cents each, extra. With arms 75 cents per chair, extra. Dealer's price \$5.00. Height 38 inches, Seat 17½x18 inches. Shipping weight (one), 50 pounds, (six) 160 pounds.

The Manufacturer that offers you "Solid Oak" and does not say whether it is Red, White, Plain or Quarter Sawn, is attempting to Deceive you—he Hopes that you do not know the Difference.

G 324 Serving Table

Come - Packt Price \$5.75. Dealer's price \$10.50. Height 34½ inches, Top 55x18 inches. Shipping weight 80 pounds.

G 433 Serving Tray

Come-Packt Price \$4.00. Dealer's price \$7.50. Size 24 x 18. Brass Handles. Plate Glass over figured chintz. Shipping weight 40 pounds.

G 412 Buffet

Come-Packt Price \$19.75. (Including French beveled plate mirror). Dealer's price \$45.00. Height 51 inches, Height to top shelf 40 inches, Width 50 inches, Depth 21 inches, Legs 2 inches, Mirror 8x30 inches. Three drawers, Antique Copper Trimmings. Shipping weight 320 pounds.

G 415 China Closet

Come-Packt Price \$15.25. (Without glass). Glass inserted, \$2.50 extra. Dealer's price \$35.00. Height 59 inches, Width 32 inches, Depth 15½ inches. Shipping weight 210 pounds.

WILL ORDER AGAIN

I received the furniture I ordered some time ago. It went together perfectly and with very little trouble. I am well satisfied and hope to give you another order in the near future.

Yours truly,

J. W. CREGLOR,

545 Oak Street

Dec. 12th, '10. San Francisco, Cal.

Quarter Sawn White Oak used exclusively unless otherwise mentioned in the description of each piece

We will be glad to have you write to us of your requirements in furniture and we can possibly be of assistance in making recommendations of suitable designs and finishes for your rooms.

G 609 Ladies' Dressing Table

Come-Packt Price \$10.75. (Including French bevel plate mirror). Dealer's price \$21.00. Extreme height 57 inches, Height to top shelf 30 inches, Top 34x18½ inches, Mirror 20x18 inches. Shipping weight 130 pounds.

G 616 Chifforobe

Come-Packt Price \$25.75. Price includes umbrella rack, scarf holder and rod for clothes hooks. The Chifforobe can be furnished without interior drawer section for \$21.25. Dealer's price \$45.00. Height 5 feet 6 inches, Width 40 inches, Depth 21 inches.

The Chifforobe is as "handy as a pocket in a coat," and not only a convenience but almost a necessity in a bedroom where closet space is limited. It does away with a chiffonier and at the same time provides ample room for hanging clothes, dresses and other apparel and boots and shoes. The price is nothing compared with the convenience that this artistic piece of furniture assures you. Shipping weight 295 pounds.

G 606 Dresser

Come-Packt Price \$14.25. (Including French bevel plate mirror). Dealer's price \$28.50. Extreme height 70 inches, Height to top shelf 34 inches, Width 39 inches, Depth 19 inches, Mirror 24x30 inches. Shipping weight 240 pounds.

Glass shelves furnished for \$2.50 each extra. Glass in sides 37x9, glass in doors 37x11 inches. Shipping weight 230 pounds.

Mission Pianos and Piano Players

Selling furniture, pianos or other commodities by mail direct from the factory to the user offers every possible and logical argument for economy and efficiency—it means the elimination of waste in sales cost,—the total absence of more than one profit in the selling price,—economy of freights and handling costs,—utter elimination of expensive show rooms and the necessary clerical work of conducting business along antiquated lines.

Piano Manufacturers ordinarily figure \$100.00 as the cost of selling a piano in the usual way. In addition to this cost of selling, the Agent or Dealer must add his profit to the price and all freights, handling and other expenses are also a part of the selling price.

We show on this and the opposite page what we consider to be the finest made and the best toned piano that is sold below \$750.00 and if we were to add one, two, three or five hundred dollars to our selling price, we would not know wherein we could give you better piano value,—it is a striking example of the difference between price and value. Price means what you pay for an article, while value means what you get for what you pay.

When you buy a *Come-Packt* piano, you pay for no commissions, allowances or other extras, that add to the price and not to the value of the piano. You pay for the actual cost of production plus one small profit and you receive in return an absolutely high grade piano that is without a rival in the class below \$750.00 in price. It is beautifully finished, and mechanically perfect. The scale is flawless and both bass and treble have the rich full tone and responsive quality that shows the class of the piano and distinguishes it from a mere collection of wood and metal.

The scale is perfect and both bass and treble have a remarkably rich, harmonious, liquid tone that is a perpetual delight. It possesses that sympathetic quality and sonority as well as the clearness demanded by the exacting pianist,—no other piano or piano-player surpasses our instruments in musical quality or structural soundness. It is preeminently a high class musical instrument that with the care and attention which should be given any piano whether purchased from us or elsewhere, will give the service and satisfaction that you ought to expect from an instrument of the highest quality.

We could write pages of description about the perfect action,—the scientific accuracy with which the whole instrument has been designed and tell you the kinds of materials used and where and how procured, but this would probably all be meaningless. You want to know that the tone is perfect,—that the action is flexible,—that the piano is as represented and that it will give enduring satisfaction as a musical instrument. These points are all guaranteed by us and any instrument may be returned if it is not as represented and the best value obtainable for the money.

G 442 Piano

Come - Packt Price \$195.00 (including Mission piano bench with compartments for music). Dealer's price \$450.00. Furnished in quarter sawn white oak only and in your choice of Mission finishes.

Height, 4 ft. 6½ in. Width, 5 ft. 2 in. Depth, 2 ft. 3 in.

Shipping weight, 750 lbs.

G 442

G 443 Piano

Come-Packt Price \$210.00 (including piano bench with compartments for music) Dealer's price \$500.00. Choice of Burl Walnut, Fancy Mahogany or Quartered Oak with high gloss oil rubbed finish. Price with interior piano player attachment \$410.00. Any piano player music rolls may be used with this instrument. Specify 65 or 88 note player when ordering, or 88 note player will be furnished, as the 65 note players are rapidly going out of use. Descriptions, measurements and shipping weight are the same as for G 442 on opposite page.

G 443

A Harmonious Room

A Mahogany piano in a "Mission" room would be entirely out of harmony with the balance of the furniture and while the music would doubtless be sweet and melodious, there would still be a lack of harmony to the setting that would be discordant and as unpleasant to look at as a piano out of tune is unpleasant to listen to.

Our Mission piano has been designed to harmonize with **Come-Packt** furniture and, of course, the purchaser has a choice of stains so that not only will the piano harmonize in design, but the finish will be identical with the balance of the furniture in the room. The cases are double laminated both inside and out and every precaution and care is used to produce the best case and the most durable ensemble that can be made by human ingenuity and the best of mechanical equipment.

G 443 with Player Attachment

Piano Player Action

Our piano player actions are mechanically perfect, the mechanism is "built-in" and a few simple movements will convert either of our pianos into a piano player. The controlling devices afford a wide latitude of interpretation and responsiveness, only equalled by the most expensive player actions and the untrained music lover has at his command the whole range of music from the popular ballad to the serious works of the Masters. The piano player is a perpetual delight to the whole household and an appreciation of music may be attained in a short space of time that would otherwise require years of attendance at the opera or concert hall.

The player mechanism requires no sacrifice of the tone quality or appearance of the regulation piano, and when not in use as a player, the piano gives little hint of its dual role. The player may be installed in any one of our pianos at the prices shown under the description of the pianos.

G 24 Rocker

Come-Packet Price \$12.00. (Imperial leather seat cushion only). Cow-hide covers, \$2.00 extra. Roan skin, \$3.00 extra. Back cushion complete, Imperial leather, \$2.50 extra. Cow-hide, \$4.50 extra. Our New Willow Furniture

The following pages are devoted to a few superb **Willow-Weave** designs and for excellence of materials and workmanship, symmetry and beauty of outline, these pieces are in a class with our justly famous Mission and Bungalow furniture, and discriminating taste could not select two types of furniture, so radically different in materials and construction, that would harmonize more perfectly in the same rooms.

In response to this insistent demand for some lighter, daintier designs in furniture that can be used in the same rooms with the Mission and Bungalow furniture and still keep the harmony of style and proportions as well as the soft lustrous finish has resulted in bringing out a line of hand woven willow furniture that has the supple sturdy strength of the mission style but incomparable with it in weight.

These pieces are all made of selected imported French stock and are entirely hand made by workmen who learned the art of weaving it in their native land. Nowhere else except in the genuine willow can you find the style, durability, quality and that indefinable something that makes it so different from the reed, fibre or rattan furniture that has flooded the stores of our cities.

Willow-Weave is not intended as an appeal to cheapness,—the cost of the imported stock and the whole hand-work process makes it impossible for these pieces to compete in price with the machine made reed, fibre or rattan furniture.

Cushions for any of the chairs, unless otherwise specified, will be furnished at the following prices:

Figured Tapestry . . .	\$1.00
Imperial Leather . . .	1.25
Cow-hide	1.75
Roanskin	2.00

All "Willow Weave" Furniture is shipped **UNSTAINED** unless otherwise specified.

We make swing seats to match any chair at \$2.50 extra to list price, including hooks, chains and all necessary fittings.

Finish—The **WILLO-WEAVE** may be stained with the same soft colors as the mission furniture and in finish, harmonizes perfectly with it. A rich toned brown will harmonize with our Dark Weathered, Nut Brown, Fumed, Flemish or Golden Oak, a greenish color that will harmonize with the Early English or Green Weathered and a reddish color that will harmonize with our Old English, English Oak or it may be used in the same room with mahogany furniture without seeming out of place.

Cushions—Each piece, (except where specified otherwise) is listed without a cushion. Many will prefer to make their own cushions or pads out of some of the light colored and dainty patterns in Chintz, Chambray, Cretonne, or in the figured or plain denims or tapestry fabrics. However, at the extra prices specified below, we will furnish cushions to fit the different pieces, Figured denim \$1.00 each; Imperial leather \$1.25; genuine cow hide \$1.75 and genuine imported roanskin \$2.00.

Prices—For the prices shown under each piece we will completely finish the furniture in any color specified above, or we will ship the piece "in the white." Many will prefer the piece unfinished in the natural color of the willow itself and where the willow is to be used in a room with white or cream enameled furniture, the natural color would be preferable. Cushions furnished at the extra prices shown above. Samples of the figured denims will be sent on request.

All prices are f. o. b. Ann Arbor, Mich., and include packing. All willow pieces will be shipped completely "set-up" and will take a higher freight rate than the sectional Mission furniture but as the willow pieces are so extremely light, the total freight on a single piece will hardly equal the freight on a similar piece in oak. The weights shown are the shipping weights and include weight of cushion.

Specify the color of stain desired or all **WILLO-WEAVE** will be shipped in the white, unstained.

Bungalow and Mission Lighting Fixtures

No one thing adds or detracts more from the general effect of an otherwise perfectly harmonious room than the lighting fixtures. Rooms that would otherwise be perfect in appointments are frequently marred by the conventional and incongruous combination polished brass electrolier and chandelier.

It was to meet this condition and to provide suitable fixtures to match our **Come-Packt Furniture** that we show here a splendid line of portable lamps, domes, showers, and other special designs that may fit into an otherwise incomplete corner or wall space.

Materials—White oak is the material used in making these fixtures and the same careful skill and attention to detail is followed out in their construction as distinguishes our other lines of furniture and fittings. We have endeavored to show a comprehensive line that would be suitable for most any room or occasion.

Equipment—All fixtures, whether electric, gas or oil are complete and ready for installation (except that we do not furnish electric bulbs unless specially mentioned under the description of the fixture). Such parts as electric sockets, wiring, plugs, etc., gas hose, goose neck, mantel, burner, chimney and oil fount, burner, wick and chimney, etc., are furnished with the different types of fixtures without extra charge. Insulating joints are included with combination fixtures.

Measurements—The length of a fixture means the distance between extreme points.

If measuring for domes, send distance from end of gas pipe to floor, or from ceiling to floor.

Extra length of wood chain furnished at five cents per link. Our prices are for the fixtures finished in your choice of stains,—Dark Weathered, Fumed, Early English, Nut Brown, Flemish, Green Weathered or Golden. If desired, the fixtures will be shipped in the white and may be finished up with your other furnishings or to match the interior wood work of your home.

Finish—ALWAYS MENTION FINISH, COLOR OF GLASS (a choice of green, amber, or green and brown, unless otherwise mentioned in the description of the fixture) and color of beads. **Dark weathered finish will be sent** on your order and we will use our own judgment as to color of glass, etc., **unless your order is specific in this regard.** Always order by catalog number.

Shipping—These fixtures are securely packed for shipment and very seldom are damaged in transit, however, if breakage should occur, either refuse to accept the shipment, or require the Freight Agent to write a full description of the damage on your freight bill. We do not hold ourselves responsible for goods damaged in transit but will make good any damage at our own expense when freight bill is returned to us with notation as to damage by your Agent.

Shipments amounting to less than \$10.00 will not be sent C. O. D. or on payment of 25 per cent of purchase price unless collection charges are assumed by the purchaser.

Specify in your order the color of stain and glass desired, or dark weathered stain and green glass will be furnished.

Why not keep the unnecessary Profits and Expenses in your own Pocket?

GB 723 Plano Lamp

One light electric, gas or oil. Green, amber, or green and brown art glass furnished only. Shipping weight 25 pounds.

If we have not Explained all to you Clearly, do not hesitate to ask for further information.

GB 653 Portable

Come - Packt Price \$3.50. (Art glass). Dealer's price \$6.00. Height 22 inches, Shade 14½x14½ inches, Base 7x7 inches, Stem 13¼x13¼ inches. One light electric, gas or oil. Green, amber, or green and brown art glass furnished only. Shipping weight 25 pounds.

GB 793 Portable

Come - Packt Price \$4.75. (Art glass). Dealer's price \$6.50. Height 24 inches, Shade 15x15 inches, Depth of apron 2½ inches, Base 7x7 inches. One light electric, gas or oil. We furnish only green, amber, or green and brown art glass with this portable. Shipping weight 25 pounds.

Always mention finish, color of glass and beads desired.

GB 164 Portable

Come - Packt Price \$2.80. (Plain art glass, no fringe). 3 inch Seed Beads, \$1.00 extra. Dealer's price \$5.50. Height 19 inches, Shade 12x12 in. hes, Base 6x6 inches. One light electric, gas or oil. Green, amber, or green and brown art glass furnished only. Shipping weight 25 pounds.

GB 924 Dome

Come-Packt Price \$1.75. Dealer's price \$6.50. Length 48 inches, Dome 14x14 inches, Depth 8 inches. One light electric, plain art glass with bead fringe. Shipping weight 45 pounds

GB 113 Portable

Come - Packt Price \$1.75. (Art glass). Dealer's price \$6.50. Height 25 inches, Shade 14x14 inches, Base 7x7 inches. One light oil. (Same price when modified to electric or gas lamp). Green, amber, or green and brown art glass furnished only. Shipping weight 25 pounds.

Invest your Money—don't merely spend it. Buy Furniture from the View Point of Service.

GB 722 Taper Candle Stick
Come-Pack Price \$3.50.

Plain art glass no fringe. Dealer's price \$6.25. With 4 inches seed head fringe, \$1.00 extra. Height 16 inches, Shade 7 inches, Base 5 inches. One taper candle stick. Shipping weight 15 pounds.

GB 452

Come-Pack Price \$4.25.

(Art glass). Dealer's price \$6.25. Height 24 inches, Shade 14x14 inches, Base 7x7 inches. One light electric or gas. Green, amber or green and brown art glass furnished only. Shipping weight 25 pounds.

GB 522 Taper Candle Stick

Come-Pack Price \$2.75.

Plain art glass. Dealer's price \$4.75. Height 16 inches, Shade 5 x 5 x 5 inches, Base 5 x 5 inches. One light taper candle stick patent candle holder. Shipping weight 15 pounds.

GB 114 Gas Dome

Come-Pack Price \$8.50. (Plain art

As oil dome, \$2.00 extra). Dealer's price

Length 54 inches, Spread 20x20 inches,

Depth 4 inches. Made only in green leaded art

Shipping weight 60 pounds.

GB 673 Shower

Come-Pack Price \$18.75. (Plain

art glass). Leaded art glass as shown, \$4.25 extra.

Dealer's price \$35.00. Length 24 inches,

Ceiling plate 18x18 inches, Lantern 11x11x10

inches, small Shades 7x7 inches. Five light electric

ceiling shower. Shipping weight 60 pounds.

Small articles like the Foot Rests and Lamps should be ordered with other pieces, as the freight charges will be very small compared with the freight when shipped alone.

GB 114 is furnished as a gas dome—see GB 1014 for electric dome.

GB 1014 Dome

Come-Pack Price \$8.50. (Leaded art

glass). Dealer's price \$14.50. Length 54 inches,

Spread 20 x 20 inches, Apron 4 inches. Two light

electric. Shipping weight 50 pounds.

Cluny Lace Curtains

In presenting the following illustrations of our Cluny lace Curtains, we feel that we are filling in an adequate way, a long standing demand on the part of our customers for something out of the ordinary, for something of real intrinsic worth in this line of hand made goods but at prices that would be low for machine made imitations of them.

You will find gathered in these few pages an array of lace curtains second to none. Beauty of design, excellence of workmanship and range of patterns, to say nothing of our low prices, characterize the entire line and places before you a selection of curtains that it is impossible to equal the World over. The discriminating purchaser will here find the height of satisfaction in hand-wrought fabrics, real Cluny laces, combining, as they do, old traditions of the French Peasantry with modern ideas of superb design.

There is no secret as to why we can sell our curtains at the extremely low prices listed under the description of each curtain.—There are no middlemen's profits. Our laces come direct from the hut of the peasant in France to our mill where they are made into curtains to be delivered direct to our customers,—there are not five or six profits to be added to the selling price before the curtains reach your windows. The curtains are produced by workmen life long in the business and the COME-PACKT guarantee stands behind every pair.

All laces listed as *real Cluny* are absolutely hand-made and pure linen and are mounted on the best quality

French nets, made especially for us or where specified, the mountings may be of the best quality of etamine.

The cotton laces are mounted on a light net but the values are exceptionally good.

Dimensions—The dimensions given in the description of each curtain are the measurements of the single curtain,—thus the dimensions of $2\frac{1}{2}$ yards by 45 inches, means that each curtain of the pair is $2\frac{1}{2}$ yards long and 45 inches wide.

Prices—All prices are quoted by the pair and the price is the same for the white, ecru or Arabian (tan). Be sure and state the color wanted when ordering or white net will invariably be sent to you.

Shipping—Express rates are practically the same as mailing rates but where two or more pairs are ordered, it is usually best to ship via Express, delivery is safer and we *advise* this means of shipment. Mail or express charges for any curtain will be 25 cents per pair in addition to list price.

Samples—There is practically no waste in the cutting of our laces and on account of their cost, we cannot send samples indiscriminately of the laces, however, all curtains are sold subject to approval of the purchaser and may be returned at our expense if not satisfactory. All orders amounting to less than \$10.00 must be accompanied by cash in full or collection charges must be assumed by the purchaser.

GC 100

Come-Packt Price \$1.25 per pair. Dealer's price \$2.25. $2\frac{1}{2}$ yards by 36 inches. White or ecru. Has $1\frac{1}{2}$ -inch hems and cotton lace same width.

GC 110

FIRELESS COOKING

Modern Fireless Cooking is an evolution or improvement in the methods of prehistoric ancestors, who took heated stones from their camp fires, put them in a hole in the ground, and over them placing the fish or other food to be cooked, then covering the improvised cooker with leaves and sods to keep the heat of the stones from escaping.

To-day we have metal boxes which are lined with the best known materials for resisting heat, and the modern cooker of to-day depends for its efficiency upon the tightness of the cooking utensils used, the heat resisting qualities of the insulating materials, upon the heat radiating qualities of the radiator, the ease and facility upon the refinements of methods in combining all the best known principles, materials and experience in getting these parts into marketable shape.

The fact that hundreds of thousands of women operate and are enthusiastic about Fireless Cookers, proves their practicability. There cannot be any question as to the economy of operating them. The question of convenience is apparent without a demonstration. The fact that the food is better cooked, that it retains its natural flavor, that it is impossible to overcook the food, that the food tastes better, and is healthier, is easily demonstrable. In these times of advancing prices and higher cost of living, and the tendency towards continually advancing prices, the economy of fireless cooking cannot be urged too strongly. No invention of modern times has been such a comfort to thousands of women who have always been tied down by the drudgery of housework and cooking.

The Rapid Cooker solves the problem of having delicious meals ready when you want them without worry, rush or confusion. The meals may be kept warm for hours without injury to them and when you decide to invest in a fireless cooker as you will do sooner or later, buy the one that saves the most time, the most work, the most fuel, and the most money. Buy a Rapid Cooker.

Illustration No. "G" 416 shows the three compartment cooker with complete equipment. The radiators may be heated in any way most convenient. On a gasoline stove, gas stove, range, alcohol stove, furnace or camp fire. They are indestructible and cannot break or deteriorate.

Illustration No. 1 shows a cross section of our three compartment cooker and a detailed explanation of each part. The Rapid does perfect cooking in one-third less time than any other cooker made. It will bake, roast, boil, fry, stew or steam. There is practically nothing which cannot be cooked with this equipment.

Each cooker is shipped complete and absolutely ready for use. The equipment includes three solid aluminum utensils—one eight quart and two four quart and you may place one of the 4 quart utensils inside of the 8 quart kettle, making an ideal double boiler when desired; metal radiators for each compartment; hook for hanging hot radiators; rack for baking pies and cakes; rack for holding radiator while roasting or baking; four Universal Casters; making it easy to roll cooker to convenient place; 48 page Direction and Recipe Book.

The cooker is constructed completely out of metal, inside and out, and grained to represent oak, it cannot warp or twist. Absolutely sanitary; no cloth pads. Metal composition radiators which cannot crack and break as do the soapstones used in other cookers. Furnished absolutely complete, ready for use. No extra to buy.

This Rapid is guaranteed to completely satisfy you in every way, and if it is not all that we represent, you may ship it back to us at any time within thirty days and every penny you have paid will be refunded to you together with freight charges.

Each compartment of the cooker is entirely separate from the others and opening one compartment does not disturb the others. All cooking utensils are of the highest grade of aluminum, and would cost you in a retail store at least \$1.00 or \$5.00. This equipment has everything that any fireless cooker should have and many exclusive features.

The Rapid is sold only direct from the factory and not through dealers. Every Rapid is positive proof against dissatisfaction—handsome in appearance and made to last a lifetime. By our special process of insulation and packing with specially compounded mineral wool and asbestos lining materials, we have attained the perfect principles of holding all the heat generated in the food after you first place it over a fire for a few minutes, before putting it in the cooker, as indicated by the recipes in the book.

No fire or flame is needed after that with a Rapid. No taking out and reheating or putting back as with others. That helps to make the Rapid the Fastest Fireless Cooker in the world.

Then also with patent locking tops the Aluminum Cooking Utensils fit down so perfectly into the Metal Lined Non-Rusting Sanitary Compartments that all the heat is retained and no steam or hot air can escape, or cold air permeate the utensils when they are closed and placed in the cooker. That adds to making the Rapid faster in finishing the cooking of each meal.

You will notice that Rapis are Metal Lined with Non-Rusting Material, so to make them easily cleaned with a cloth and absolutely sanitary. Each cooking utensil fits perfectly into each compartment so that there is no dead air space to heat. That also makes the Rapid cook faster.

Remember these facts about the Rapid because it is only by following these careful principles that satisfactory fireless cooking can be accomplished under all conditions.

The Rapid is made in two and three compartments. The three compartment size is 37 inches long, 13 1/2 inches wide, 15 1/2 inches high, shipping weight 100 lbs. The two compartment size 36 inches long, 12 1/2 inches wide, 15 1/2 inches high, shipping weight 90 lbs. **Come Pack Price**, (three compartment Cooker) \$11.85, ordinary retail price \$15.00. The price of the two compartment Cooker is \$10.85 ordinary retail price \$14.00.

Order a Cooker to come with the rest of your furniture or have it come alone, but do not deny yourself a day longer the convenience, the economy, and the pleasure of having a Rapid in your kitchen.

SUCTION CLEANING

The merits of suction cleaning as against the drudgery of the unsanitary broom hardly calls for argument,—every one acknowledges the desirability and unquestioned cleaning power of an efficient suction cleaner. The whole "bulk of the evidence" is summed up in the one word "efficient." There are various types of cleaners on the market, some of unquestioned merit and multitudes of others that are made, designed and intended solely to "sell" and without sufficient power to do the actual work that is required of a cleaner.

To do efficient work a cleaner must displace a certain volume of air and do it under service conditions in a certain length of time. Ordinarily speaking a cleaner should be able to displace 32 cubic feet of air per minute when the cleaning tool is held against a heavy fabric, like a close woven rug or carpet. Our cleaner will displace 45 to 50 feet of air per minute and do it under the most severe tests, not merely for a short space of time, but the machine is built to do this work regularly, hour after hour and day after day.

Hand operated machines and machines that are designed to be moved about from room to room are simply out of the question,—the first type is clearly impractical to operate successfully and the second type rarely has sufficient power to do the work required and if by any chance the motive power and pump or fan should be of sufficient power to do the work, imagine a woman trying to carry the equipment about from room to room or attempting to carry it up and down stairs.

The logical equipment is one that has sufficient power to do work required and this means that the equipment must be more than a toy,—it should be placed where most convenient, in the basement or cellar, and a pipe should run from the machine to the different floors of the house, and a light suction hose may be carried from floor to floor by a child, and the different rooms absolutely renovated. This does not mean merely to take up the surface dirt like a carpet sweeper but to draw the air in large volumes through the carpet or fabric being cleaned, and the dirt deposited in the dust separator of the machine in the basement or cellar. The pipes may be put in an old house as easily as one in process of construction. They may be put in your own house or in a rented house and removed again without injury to the property.

Our equipment consists of: 1st.—A light weight but powerful motor rated at one-half horse power, but capable of carrying a fifty per cent overload without injury during constant service (1750 R. P. M.).

Illustration "G" 439 shows the complete electrical equipment, motor, rotary pump, relief valve, belt between motor and pump and the dust separator box.

2nd.—Our pump is a positive rotary frictionless vacuum pump of the type that is used in foundries and forges where high pressure or suction is required. It is powerful, efficient, reliable and built for service. It is not a toy or delicate piece of mechanism that will get out of order easily.

Illustration "B" shows a cross section of the equipment and the interior parts of the positive rotary pump, showing both the gear connections and the frictionless action of the pump itself.

3rd.—The other part of the equipment shown in the illustration is the dust collector or separating device. It is a large enclosed bag made of specially woven canvas and attached to a galvanized collar inside of the separator box. The bag is so large that it will need emptying but only once every three or four weeks. All air before passing through the pump is thoroughly cleaned and free from dust, insuring long life to the pump. Our machine gets all of the dust quickly and without endless labor to the operator. It requires volume and tension to do this and the right pump and strong enough motor to develop such volume and tension. It is built for people who want a real cleaner and who can tell the difference between such a one and the ones that are made merely to "sell."

Our suction regulator situated above the pump renders possible the cleaning of the finest fabrics as well as the heaviest carpets by the mere turning of a screw to regulate the tension of a spring. We call especial attention to this device as it is found in no other cleaner that we know of.

Installation—Illustration "C" on opposite page shows one method of installing the equipment. This shows the cleaner with concealed "house" pipe between the walls. In an old house, where an equipment is to be installed, the house pipe is run up through the floors in an inconspicuous corner, near steam pipes, or if desired it may be run through clothes closets or clothes chutes. The work and cost of installation, including cost of pipes and connections, should not exceed ten to twelve dollars at the outside.

(Drain pipe connections should always be made with suction cleaning apparatus so that there will be no projecting lip or obstruction to the free passage of the dust or other particles taken up from the carpets).

Illustration "A" shows the 9 inch carpet tool, 3 inch upholstery tool, button tool or nipple and a slip nipple for connecting the suction hose to the house pipe.

The power equipment is placed in the basement or cellar. No special foundation required, as the plant is complete in itself. One single 1½ inch pipe runs from a point near the machine up to the floors above. Only a single straight pipe is required and no skill is necessary to install the outfit. We furnish absolutely every part, fastening and fitting except the pipe and tee running from floor to floor. It should not cost to exceed ten or fifteen dollars to equip a two or three story home with the necessary piping, and including the labor of putting the pipes in.

Motor—We furnish either direct or alternating current motor (your local electric lighting company will advise you the voltage of the current and the number of cycles, if an alternating current is used) no starting box required. The pump may be used as a suction device or the operation may be reversed and a powerful blast of air blown through the hose by attaching the discharge blower to pump. The cost of operating the motor should not exceed fifteen cents on a ten hour run. The belt may be slipped from the motor and pump, and the motor used as power to operate household machinery, such as washing machines, wringer, mangle, lathe, etc. This feature alone is well worth your consideration.

Equipment—All necessary fittings for installing the outfit and one carpet tool, one upholstery tool, one button tool, 25 feet of wire inserted suction hose and six feet of hose to connect the 1½ inch pipe with the dust separator are included with the equipment. Extra suction hose furnished at 35c per foot.

Dimensions—Height 31½ inches. Width 15 inches. Length 37½ inches. Net weight 200 pounds. Shipping weight 250 pounds.

G 439

Come-Packt Price \$175.00 complete f. o. b. Ann Arbor. Ordinary price of an equipment equally as efficient \$350.00 to \$450.00.

Illus. "B."

G 439

VALUE versus PRICE—The foremost and guiding principle of the **COME-PACKT COMPANY** is not only to produce furniture, or other articles, "as good as can be made for the money," but to produce goods of such undisputed merit and excellence that discriminating purchasers will select them purely on their merits, regardless of the saving that can be made by buying direct from our factories.

Judge our goods not by price but by merit. Price is merely a measure of dollars and not a measure of value. With unpatented non-monopolistic articles it is usually the cost to *sell* and *not* the cost to manufacture that makes the prices high. Increases in cost of production do influence selling prices for the reason that the merchant does not cut his profit but adds the increased cost of production to his prices and in the end makes the same net profit.

Compare our goods with any other goods, compare the designs, workmanship, materials,—judge point by point, merit for merit, quality for quality—and then after you have judged of the relative values, look at the prices.

COME-PACKT SECTION CLEANERS—Sifted down to the essentials, section cleaners should have a pump of some sort (an efficient pump, presumably),—motive power of some sort (for home use an electric motor, preferably, and of sufficient power to do actual work), and a dust separative device (one that really separates the dust from the air current). Aside from these essentials any further device will add to the price and not to the value or efficiency of the equipment.

We have absolutely reduced suction cleaning to its simplest elements. We have eliminated nothing that could add to the efficiency of the cleaner and have added nothing that would complicate or increase the manufacturing cost or selling price. No licensed engineer is required to operate our cleaners,—there is nothing to get out of order and every home should have a cleaner as the small first cost is the *only* cost and a cleaner in the home means a sanitary home free from dust and microbes,—it means the absence of the drudgery and unpleasantness of the weekly war with the broom and dust rag,—it means a perpetually clean home (not merely clean once a year),—and the nightmare of tearing up carpets and rugs for the annual encampment is a thing of the past.

Suction cleaning is not a fad,—it is a reality and the time is coming when a suction cleaner will be as much a part of the equipment of a well appointed home as sanitary plumbing is considered a necessity today. The home without a cleaner will be the exception and not the rule. Efficient cleaners cannot be made and sold for less than the prices we ask,—do not "wait for prices to come down." *Our prices are down now* and can go no lower.

We cannot urge too strongly the convenience of having a motor in the house that will not only operate the suction cleaner, but the washing machine, mangle or other household machines. Our motors will do all this work efficiently, economically and are always at your service. A home with all of the mechanical conveniences will seldom have a servant problem to face. Help will remain where work is made light.

Illustration "G" 441 shows one of our gasoline power cleaners mounted on a steel truck as used for commercial cleaning. This gasoline cleaner may be mounted in the basement, in the same manner as the electric cleaner, and both the exhaust of the engine and the pump piped into the chimney.

COMMERCIAL CLEANING—At a small additional cost we will furnish a roller bearing steel wagon the exact size of the cleaner base and either with or without canopy as desired. The equipment may then be moved from house to house and a man or youth of from 15 years up should be able to earn from 5 to 10 dollars a day in a dignified manner and in a short time become independent and the owner of a prosperous and vigorous business. The connection from the end of pipe to the separator is a flexible hose and may be slipped on or off at will, rendering the machine adjustable either for commercial cleaning or household use. No special foundation is required and it takes only ten minutes time to convert the outfit from an efficient stationary plant to an efficient money earning commercial outfit. When doing commercial work the machine is left out of doors and the hose is run in through a window the same as when using a commercial gas engine device. We will be glad to go further into the possibilities of Commercial Cleaning with interested parties.

COME-PACKT PRICE "G" 441 Gasoline equipment (without truck) \$250.00, steel truck \$5.00 extra. Shipping weight 450 pounds.

Why pay from \$1,500.00 to \$3,500.00 for a commercial cleaner when they are no more efficient than our commercial cleaner?

G 441

Illustration "G."

Come-Packt Asbestos Table Covers and Mats

Hot dishes are essential to good dinners, but hot dishes will sooner or later spoil the table top, unless that top is properly protected.

The ordinary cotton table felt or "Silencer" will not give proper protection, because heat will pass through them.

All house-wives who use a GOOD ASBESTOS TABLE COVER will enjoy their meals far better if they know that there is a protection under the table-cloth that will permit hot dishes to be placed at random on the table without injury to the top. For the convenience of our customers we carry the VERY BEST ASBESTOS TABLE COVER that is made.

This cover is composed of two layers of pure asbestos on each side of a layer of wool-felt, making a perfect insulation with a soft and durable surface. They are covered with heavy flannel jackets which may be removed and washed.

These covers lie perfectly smooth and flat; do not spoil the table setting in any way and can be folded to put away when not in use.

The small asbestos Table Mats are made of the same material as the table top covers with the exception of the removable flannel jacket. The very best non-conductor of heat obtainable for use under hot dishes.

All pads are put up in attractive boxes and prices quoted are for either round or square tops. Leaves furnished at the extra price quoted below:

Price List

44-inch diameter tops	\$3.50 each
45 " " "	3.75 each
48 " " "	4.00 each
54 " " "	5.00 each
60 " " "	6.25 each
Leaves, 44x980
Leaves, 45x985 each
Leaves, 48x990 each
Leaves, 54x9	1.00 each
Leaves, 60x9	1.10 each

For either round or square tables, give extreme diameter of tops, when ordering, and if leaves are wanted, state number and width of leaves. If tables have a beveled edge measure only to top of bevel.

Price List of Sundries

Every order includes free the stains, wax, brush and everything needed to finish and set up the goods, but many customers desire additional materials for other work so we quote the following:

Stains, any color listed.....	per 1/2 pint, \$.25
(1 gallon should cover 700 square feet of hard wood; 400 feet soft wood.)	" pint, .40
.....	" quart .75
.....	gal. 3.00
Liquid Wax, Mission-Lac or liquid glue, same price for quantities as quoted above on stains.	
Prepared Furniture Wax(hard)	1/4 pound, .15
Stain Brushes.....	each, .10

When ordering leather of any kind specify carefully the exact dimensions desired. I.e., special leather (imitation), any color listed and in either the natural or "Spanish" grain, 50 inches wide; best quality.....per square foot .15

Come-Packt Stains and Finishing Materials

The interior wood work and furniture, wherever possible, should be harmonious in color and finish. It is an easy matter to produce this effect when building a new home and COME-PACKT SPIRIT STAINS will be found superior to any other stain or dye for finishing the wood work of your house. The stains are more penetrating than an oil stain, the colors are fast and beautifully rich and deep in tone. The stains may be applied by an inexperienced person and the resulting finish will be as handsome and durable as when used by the most experienced finisher.

COME-PACKT LIQUID WAX is the best and most durable wax for floors, furniture or interior wood work, it is water proof and does not spot or turn white. It is applied with a soft cloth and forms a hard durable coating that is as soft and lustrous as an oil rubbed finish.

COME-PACKT HARD WAX is best when used over a first coat of the liquid wax, but it may be used directly over the stains and gives the same effective finish, but it will spot more easily with water.

COME-PACKT "MISSION-LAC" is a high grade varnish coater that may be used directly over the stains, particularly where the furniture or woodwork is to be exposed to the weather. It flows freely and does not show laps, drying free from dust in four hours and ready for use, or for waxing in 36 hours. No skill required in applying this coater.

COME-PACKT LIQUID GLUE is an adhesive that has no superior for furniture work. It is convenient to handle, inexpensive and invaluable to those who have frequent use for a high grade glue.

Roan skins, guaranteed, Imported goat hides, any color listed "Pebbled" grain only...per square foot .60
Cow-hides, any color listed, except black, and in either the "Smooth" or "Spanish" grain
per square foot......45
Extra table leaves furnished at the following prices each:
44-inch, \$.80; 45-inch \$.85; 48-inch \$.90; 54-inch, \$1.00;
60-inch, \$1.25. (plain sawn oak).

Unless otherwise specified, all orders for accessories, except Stains, will be sent by mail when weighing less than four pounds. Postage rate 16 cents per pound. Stains cannot be sent by mail and will always be sent by Express when ordered alone. Include enough money when ordering accessories to cover postage charge—we will promptly refund the difference, if you have enclosed too much.

KAPOK MATTRESSES

A third of our life is spent in bed and why should we deliberately secure anything but the maximum of comfort for so great a portion of our existence?

There is as much difference in the comfort of mattresses as there is in the shoes we wear.

Hair mattresses are made of different kinds and qualities of animal hair and while the higher priced hair mattresses are sanitary, to a degree, there is always the suspicion that possibly the original germs are still lurking in luxurious ease in the wilderness of hair.

Cotton mattresses are, when sufficiently stuffed to afford comfort, heavy, cumbersome and after continued use mat down and become hard or lumpy.

KAPOK (Javanese Silk Floss) besides possessing all the resiliency of the best grade of hair mattress is absolutely sanitary, it will not absorb moisture (it is four times as buoyant as cork and is used extensively in the marine cushions and mattresses which are on occasion used as life preservers), it is extremely light as compared with cotton or hair, it will not mat down nor become lumpy, the mattress can be easily handled or turned by one person, it is absolutely sanitary and in a word, the **KAPOK** mattress has all of the good features of any mattress and none of the bad ones. It is lighter, cleaner, more durable, more healthful and more comfortable than any mattress made.

Only the best grade of the **JAVA KAPOK** is used and we guarantee the finished article to be more satisfactory than any mattress sold at any price. A strong statement but the proof is in a trial. The mattresses may be returned to us if we have misrepresented in any way. The mattresses will weigh from 22 to 35 pounds depending upon the size.

3 feet wide, 5 inches thick	\$ 9.50
3 feet 6 inches wide 5 inches thick	10.50
4 feet wide 5 inches thick	11.50
4 feet, 6 inches wide, 5 inches thick	11.75

COMBINATION MATTRESS AND SPRING

We list also an upholstered combination mattress and spring, which we call the "Imperial," which may be used on both iron and wood beds, no other mattress being required. The spring contains 130 tempered steel coils which are covered with good burlap, and upon this is placed a thirty pound pad of the best cotton felting. A ticking is then put on over the cotton felt, covering the entire top, sides, and ends. This mattress is finished up with the Imperial Spring Roll Edge, making a very rigid, and at the same time a very resilient mattress. The total weight of the spring and mattress is approximately 65 pounds, as against 150 pounds for the old style box mattress and springs. (This mattress can be made in two parts at an extra charge of 75 cents).

Come-Packt Price	\$12.50
Dealer's Price	18.00

VULCAN SPRINGS

In the Vulcan we have an ideal spring which combines comfort and strength. The frame is made entirely of hard steel angles. There is not a single piece of breakable cast iron in the construction. Springs are of No. 11 gauge highly tempered steel wire, and each spring is securely riveted to the frame. The tops of the springs are connected by a series of tie wires which hold the springs firmly in an upright position, at the same time allowing each coil to act freely enough to enable the mattress surface to conform to the shape of the body, making an exceedingly comfortable bed without sacrificing the durability.

The hooks or hangers are adjustable so that the spring may be used on metal beds with either style side-rails, and also on wood bed-stands.

Made in 3 ft., 3 ft. 6 in. and 4 ft. 6 inch sizes.

Come-Packt Price \$6.95 for any of the above sizes, Dealer's price \$12.00. Shipping weight 70 pounds (4 ft. 6 inch size.)

Duty to Canada—Thirty per cent ad valorem on all furniture, lamps and brass ornaments.

Duty to Mexico—Cushioned or upholstered furniture 30 cents per kilo Mexican money. Other furniture twenty cents per kilo Mexican money. Brass ornaments 50 cents per kilo Mexican money. Lamps 70 cents per kilo Mexican money.

Export Orders—Come-Pack furniture is specially adapted for export shipment and receives expert attention in our Foreign Department. Freight rates given to all points upon application. An extra charge of 5 per cent is made to cover packing charges on all export shipments routed via steamer. This does not apply to all rail shipments to Canada or Mexico.

Freight Rates—The above rates per Hundred Pounds apply on our Sectional Furniture from Ann Arbor, Mich., to points named. If your own City is not in the table, take the freight rate to the nearest point named and multiply it by the shipping weight (given under the description of each piece), and the result will be the approximate charge to your station.

The minimum freight charge is the least amount that Railroads accept for transporting freight to a given point regardless of its weight or classification. (See minimum charge column in rate table).

The list in opposite column gives the classification of the different articles we have listed. For instance, if you live in Moore, Ala., and you wish to get the freight charges on a davenport to your city, the shipping weight will be found under the description of the piece, and by looking down the classification list you will see that the davenports go under class "F" and in the freight rate table class "F" takes a rate of \$1.16 per hundred pounds. In other words, if the shipping weight was 200 pounds, the total freight charge would be \$2.32.

By referring to the group or classification letter, and the corresponding letter in the freight rate table, the rate may be obtained to various shipping points.

These freight rates were in effect on the date this catalogue was published (January 1st, 1911), and are subject to change by the Transportation companies without notice. All delivered prices are quoted for immediate acceptance only.

Stains and Cushion Materials

The plates on the reverse side of this page (specimens are one-half actual size) reproduce the colors of our Stains and Cushion Materials as faithfully as is possible by color photography. We will, however, gladly furnish actual specimens of our cushion materials and the finished wood on request.

COME-PACKT stains are deep penetrating, quick drying spirit stains that produce a *brilliant, permanent color* that *will not fade, wear off, or raise the grain of the wood*. The shellac and wax finish are applied over the stain, giving a lustrous beauty and depth to the satiny finish that can be produced in no other way. Our method of finishing enhances the beauty and brings to full life the exquisite markings of the *Quartered White Oak* used in Come-Packt Furniture.

There is no difference in price whether the furniture is shipped "*in the white*" or *completely finished*. All goods will be shipped in the completed sections and *finished* ready for assembling unless your order plainly states "*do not finish*." Specify carefully the color of stain wanted and the kind and color of cushion materials for upholstered pieces; otherwise *dark weathered* stain and *brown* cushions will be furnished. When goods are ordered "*in the white*" sufficient stain and finishing materials will be included with the shipment to complete the pieces.

In selecting cushion materials and stains, individual preference and home surroundings, color of walls, floor coverings and interior woodwork should decide the issue in each case. There is no choice as regards permanency of color or excellence of finish.

The *Roan* skins are imported goat hides, remarkably soft and flexible, and are tanned and dyed in beautifully brilliant colors. These skins are furnished in the "*pebbled grain*" only.

Our *Cow-hides* are the best quality of leather obtainable, commercially known as the *outside or grain* hides. We use only these *grain* hides wherever our catalog specifies *Genuine Leather*, in both the "*Smooth*" and the "*Spanish Grains*."

NOTE: The "middle" and "flesh" splits, which we never use, are worked up into clever imitations of the outside grain hides, and when new can hardly be distinguished from them, except by an expert. These inner "splits" do not have the fibre or toughness to withstand continual usage and in a short time become shabby in appearance and unfit for use. They cost more than a good grade of imitation leather, but are inferior to it both in appearance and in wearing qualities.

Our *Imperial leathers* are the best and most carefully made imitation leather on the market. The backing is a heavy sateen and the surface coating is hand buffed. This Imperial leather is far superior to anything except the genuine grain leathers which we use, and as we have stated, is much better than the inside split leathers, which cost more money but do not give the service. We guarantee our Imperial leather, not only to be satisfactory in point of service, but in appearance as well. We offer a choice between the large markings or "Spanish grain" and the small or "Natural grain," and there are a number of colors shown.

As an added convenience to our customers and not as an argument for economy, we will *completely assemble* our furniture and ship it ready for immediate use at a net *extra* cost of *five per cent*, which merely covers the added expense of wrapping and crating. We will gladly quote delivered prices on our furniture to any destination, but please do not ask for our discount sheet, as we have none,—our prices are the same to all regardless of the size of the order. You pay no more and no less than your neighbor. Our prices are high enough to permit us to furnish the kind and quality of goods represented. Any reduction in price would necessitate a lowering in quality of materials, workmanship and finish. We would prefer to limit our output rather than lower the quality of the goods that have made our name and Trade Mark so justly famous.
